

Akshar Team Security

Securing Your Interest's

Introduction

Akshar Team Security Ltd ('A' TEAM) is a well-established security provider.

The company was incorporated in 2000 and over the years has been providing sound security solutions which meet our customers' expectations.

Our Vision

To offer High-tech security services and solutions both locally and internationally.

Our Philosophy

Your safety is our Priority!!!!

We believe in exceptional customer service and therefore work Hand in Hand with our clients to give them expert solutions and services based on their needs.

We believe in professionalism and that is why we have an outstanding pool of human resource who are keen on the vision, mission and current security issues and solutions.

Team Work

We have learnt the essence of team work. We build on our collective strengths from all levels.

The Company is backed by personnel with wide experience in all security functions.

Our commitment is to provide our clients with safe and secure environs for their peace of mind while we take care of their security needs. Our services range from static guards and dog patrol to electronic security access control and surveillance equipment.

Our Mission

To provide up-to-date security services to our customers thereby providing them with the best value for their money.

erger crime trend and advise our clients on appropriate counter measures.

Our Values

Customer Focus

The importance of our customer cannot be overstated. We maintain close interaction with all our clients to understand the security problems they may be facing.

Professionalism

Our expertise help us deliver the right solutions. We continually analyse the security threats and any emerging crime trend and advise our clients on appropriate counter measures.

Our Products and Services

Guarding Sevices

We have a stringent process of vetting and training our guards. We offer an intensive training program that covers: Protection and Preservation of assets, Incident Management, Counter Terrorism and customer Care Skills. Our guards are skilled on handling gatehouse duties, front office duties, Vehicle Inspection, Personal Searches, Perimeter and Car Park Controls and monitoring of CCTV. They are uniformed and fully equipped with Baton, LED Torch, and Whistle during their shifts.

The guards change shifts at 6:00PM and 6:00AM. In case the guard does not report the same guard on duty will inform the office and hold fort until a reliever is sent.

Clients calls are attended 24/7 and in case of any emergency, we work closely with the Police to arrest the situation.

Our guards are covered under the Workmen Compensation Act for all injuries sustained while on duty.

K-9 Unit

We have well trained and robust security dogs of quality breeds. We have German Shepherds and Rottweiler breeds. Our dogs are supervised by professionally trained handlers. The kennels are well maintained and regularly inspected by the vet. Vaccination records are well regulated.

Radio Alarm Response

We have a fleet of reliable back-up vehicles which are strategically placed for radio dispatch to attend to any emergencies within minutes. These vehicles are dedicated to security assignments and are constantly monitored through control room for positioning. They are manned by very highly trained crew members. We also provide Roadside Rescue Services for our clients. All the vehicles are monitored through a well-equipped 24/7 Control Room with the latest

Intruder Alarm System

Wired and Wireless Alarm system

In a world of Increasing Insecurity at homes and offices, it's now important to install Intruder Alarm System.

The Intruder Alarm System units are available from 8 to 128 Zones.

State of the art equipment can be installed to meet every need and budget, from basic window and door sensors all the way to motion detectors.

CCTV (IP Based / Analogue Based)

We install and maintain Affordable and High quality CCTV systems whether for your home or business. We offer both analogue and Internet protocol Cameras based on the clients preference. However we will not hesitate to advice you on the best and latest technology.

Our technical engineers recognize the importance of outlook of installation and therefore ensure absolute coverage for your security. We use recognized brands that are effective and user friendly.

Access Control

We acknowledge every organization's need to manage access to their premise, information, equipment as well as the security of their employees and visitors. It is essential to manage and monitor who has access to what office, records, entry and exit.

With these systems, you are able to restrict entrance to places and hence able to determine who is where and when. This minimizes dangerous incidents, frauds or theft from occurring.

If you are looking for any system from biometric time and attendance systems, computerized time recording solutions for flexi time workers or simply a traditional time recording machine, then we have the answers for you!!

Walk Through and Metal Detectors

The detectors are able to detect everything from medium sized pistols, knives, drugs etc. They are user friendly and have ease in maintenance therefore guaranteeing you maximum safety, protection and convenience.

The PD6500i leads the industry with advanced pinpoint technology and matchless discrimination features. It is designed for maximum throughput without compromising security, the PD6500i is the walk-through of choice for security professionals worldwide.

Perimeter Security (Electric / Razor Fencing)

Protecting of the perimeter fence is the first line of defense in asset and lives security. We undertake installation of electric and razor fences while maintaining high quality standard materials.

Security barriers can be automatic or manual and equipped with booms which are resistant to forceful access.

Under Vehicle Surveillance System - UVSS

Uvss offers the ability to capture a color image of the undercarriage of a motor vehicle within three seconds of the vehicle driving up to the entrance of the premises.

The digital colour Uvss and digital video Uvss are surveillance systems specially designed to inspect the undercarriage of motor vehicles to expose any suspicious attachment like weapons, explosives and contraband.

Security Consultancy

Even if you have had security measures in place for many years and believe you've covered all the bases, it pays to have an independent security audit. From commercial buildings to shopping malls, offices and factories to hotels and private homes, we compile comprehensive, clear reports that will leave you free to decide on your next steps. We will:

- Identify weaknesses in your physical and procedural security systems
- Review access controls and CCTV measures
- Examine accident prevention measures
- Trace flaws in your Information Technology network
- Look at the safety of staff, visitors and clients
- Assess and act to protect assets both tangible and intangible.

Parking System

We install and maintain the following parking systems:-
Semi-Manless Parking System: That is the system that has been used as a ticket dispenser (without human resource) at the entrance but still used human resource on a booth on exit access.

Manless Parking System: That is the system that is already using the machine entirely, both on entry and exit access. HR is usually employed only as a custodian of the system or the cashier at Central Payment in the building area.

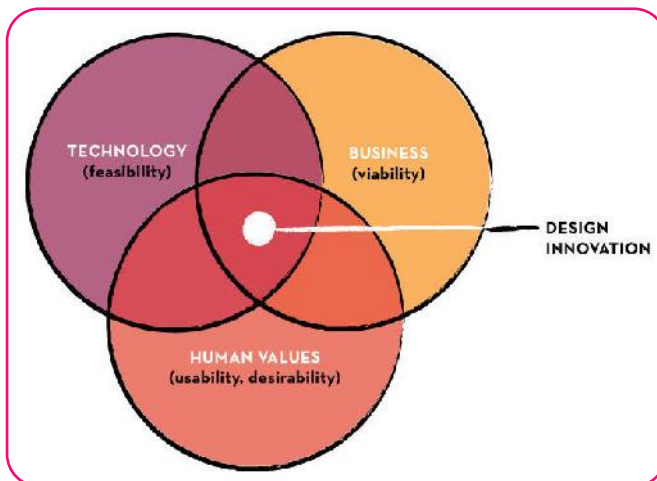

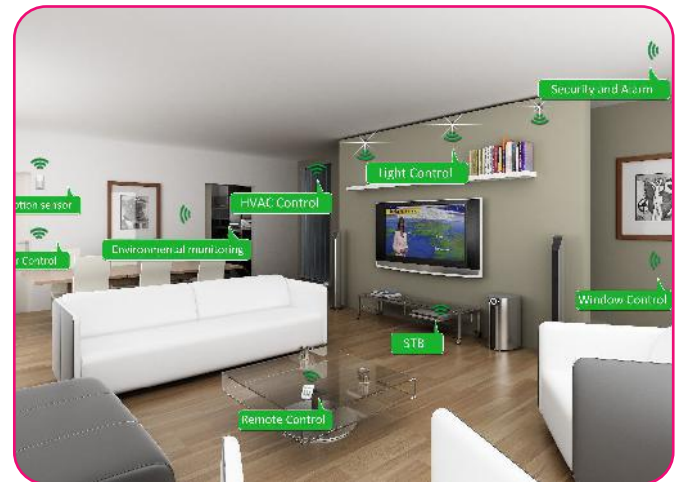

X-RAY Baggage Scanning Machines

We supply, install and maintain any X-Ray Baggage system according to your liking, your financial budget and technical requirements; and you can be sure that A Team is more than capable of handling every question you may have in your purchasing process. From planning to buying, installation, and technical services.

Home Automation

Home automation is building automation for a home, called a smart home. It involves the control and automation of lighting, heating, ventilation, air conditioning, and security, as well as home appliances such as washers, ovens or refrigerators. Wi-Fi is often used for remote monitoring and control. We do total installation, configuration and maintenance of smart home.

Design Innovation

We improve existing products and services increasing their performance, boosting usability and functionality, reframing how they are perceived and experienced, adding new features and perfecting their design. We help solve technical challenges and performance issues through the application of our design methodologies, experimenting cutting-edge technologies, developing unprecedented ad-hoc solutions and providing overall tangible innovation

Networking

Your network cabling infrastructure is vital to the success of your company.

Network Consultants, Technicians and Cabling experts are here to assist with the planning, design, installation and maintenance of your company's network and cabling installations. Our experience enables us to give you complete network and cabling solutions that fit your current needs, while accommodating any future growth requirements.

Fire Safety

We offer a wide range of fire alarm and safety equipments for both current and prospective clients and we have well experienced and trained personnel to conduct fire assessments in both private residence and large commercial premises.

The assessments advice what the current risks are at hand and the measure to be taken to curb such risks.

Command and Control Centre

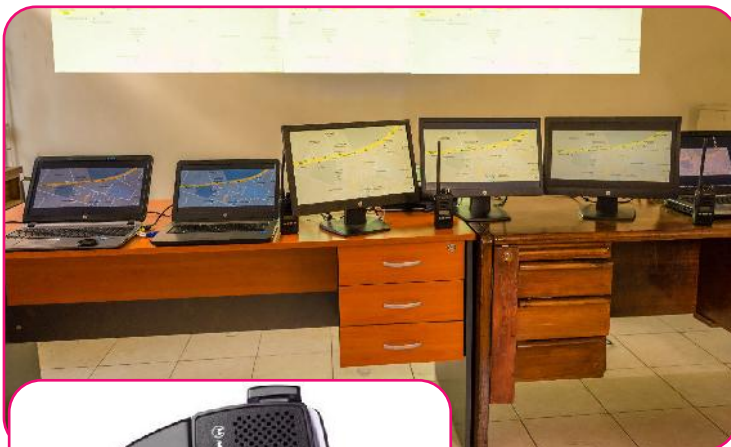

24 Hours Control Room

We have a 24 hours manned control room monitoring all security contracts.

Our duty controllers are the first point of contact that our customers, staff, potential customers, suppliers and the general public have with our company. Our controllers are well trained and receive detailed and rigorous training in execution of their duties.

The team is dedicated to their role, they have proper customer Care Skills, Good Communication Skills and have a proactive approach to issues.

A logbook is maintained to record incidents that occur nomater how trivial. The incidents are then brought to the attention of the management for further action.
